

A photograph of a modern building entrance. The building features light-colored horizontal siding on the upper portion and dark brown vertical slat siding on the lower portion. A dark, rectangular overhang covers the walkway leading to a glass-enclosed entrance. The entrance has a central wooden door with a circular black handle and a keyhole, flanked by glass panels. A concrete walkway leads to the door, bordered by a dark mulch bed with small green plants. The sky is blue with scattered white clouds.

INFINITY CLADDING

EVERLASTING

Why Infinity Decking® Cladding?

Australian Owned & Designed

Luxurious, realistic textures expertly crafted to endure Australia's harsh climate for timeless beauty.

A Style For Everyone

Experience the timeless appeal of real timber or explore modern cladding alternatives with our composite range.

Sustainable & Green

All our products are made from recycled materials, making it a more environmentally friendly choice than traditional timber cladding.

Everlasting

All Infinity Decking products are double coated with a UV protectant layer. No fading, rotting, splintering and come with a 25 year warranty.

Low Maintenance

There's nothing to do on your end other than keeping it clean whenever you have time. So you have more time to enjoy your new outdoor space.

Easy to Install

We've taken all the guess work and head-scratching out of our install system. Unlike other cladding alternatives, Infinity Cladding is a breeze.

Infinity Decking® Cladding vs Timber

Wondering how Infinity Decking Cladding compares to timber?
Here's a summary table that outlines and explains the key differences.

	TIMBER	IINFINITY DECKING
Doesn't require regular painting/oiling/sealing maintenance	X	✓
Naturally resistant to rot, decay and termites	X	✓
No requirement for regular painting, reducing scaffold time	X	✓
BAL rated	X	✓
UV stabilised	X	✓
Resistant to fading from Australia's harsh sun and rain	X	✓
Thermal and sound insulated	X	✓
Straight and consistent lengths	X	✓
Up to 25-year warranty	X	✓

Oasis vs Style - The Differences

Infinity Cladding - Oasis & Style Series.
Each have their own unique characteristics.
Choose the style most suitable for you.

Infinity Decking® | Style Series

IDSS 01
156*21mm

Our unique Dual Coating Shield isn't just designed to take on Mother Nature's harshest conditions, but it's also designed to be resistant to scratching, staining, warping and cracking for 25 years

natural colour variations and timber grain patterns that are as unique as nature itself

88% reclaimed and recycled materials, and is 100% recyclable, giving you the best of both worlds - stunning design, and peace of mind

With the Style Series you get to enjoy beauty and durability. It won't warp, rot, or cup like wood, and it's termite-resistant too. Bring out the best in your home or building with a great looking eco-friendly finish

Easy on the eyes & the earth.

Infinity Decking composite cladding is a long lasting, low maintenance alternative to timber, aluminium or any other products that can be used on various exterior projects; from home renovation to new build apartments, building exteriors or modern landscape design.

Infinity Decking Style Series Cladding is made up of 88% recycled high density polyethylene plastic and reclaimed wood fibres and is 100% recyclable. With a durable polymer outer shell encapsulating the panel, it forms an impermeable layer that protects it from scratching, fading, moisture & termites, with a high thermal efficiency helping you towards your BASIX requirements. All with a 25 year warranty.

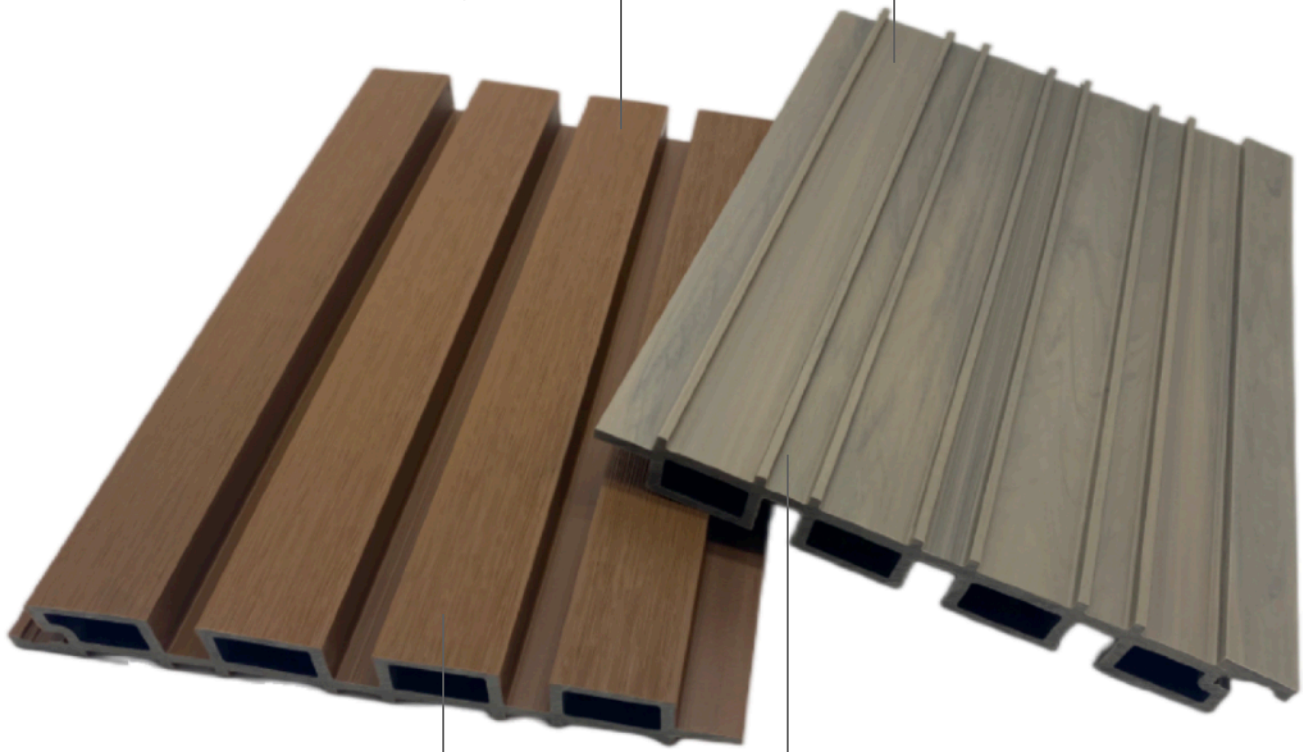

Infinity Decking® | Oasis Series

IDOS 02
219*26mm

Our unique Dual Coating Shield isn't just designed to take on Mother Nature's harshest conditions, but it's also designed to be resistant to, scratching, staining, warping and cracking for 25 years

natural colour variations and timber grain patterns that are as unique as nature itself

88% reclaimed and recycled materials, and is 100% recyclable, giving you the best of both worlds - stunning design, and peace of mind

The best of both worlds with the Oasis Series. Semi-hollow for thermal and acoustic insulation, it won't fade, warp, rot, or cup like wood, and it's termite-resistant too. Bring out the best in your home or building with a great looking eco-friendly finish

Textures and grains so lifelike, you'll forget it's not real timber.

Infinity Decking's Composite Cladding offers a durable, low-maintenance alternative to timber, aluminium, and other cladding materials, suitable for a range of interior & exterior projects—from home renovations to new apartment buildings, commercial facades, contemporary landscape designs and perfect for feature walls.

Infinity Decking Style Series Cladding is crafted from 88% recycled high-density polyethylene plastic and reclaimed wood fibres, ensuring it is fully recyclable. The cladding is encased in a robust polymer outer layer, creating a barrier that resists scratches, fading, moisture, and termites. Additionally, its high thermal efficiency contributes to meeting your BASIX requirements.

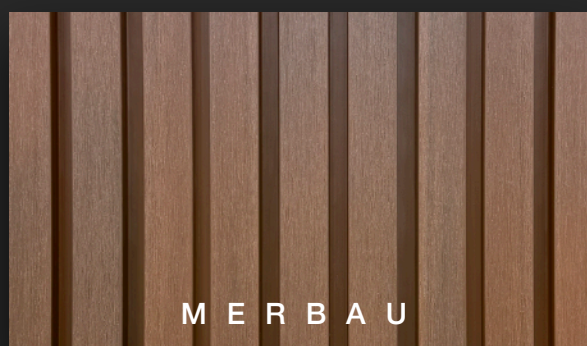

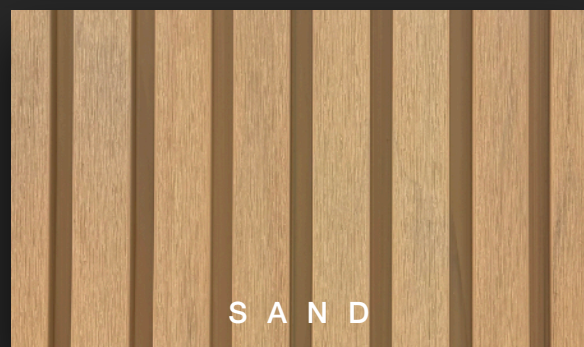

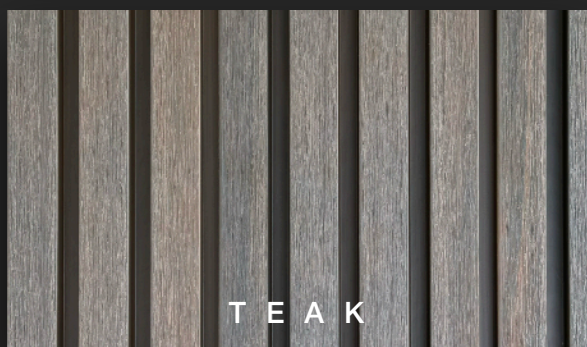

All backed by a 25-year warranty for peace of mind.
